Ruth E. Randall, Commissioner of Education

This document was prepared by the staff of the Education Statistics Section.

Published by the Public Information and Publications Section, Minnesota Department of Education, 840 Capitol Square, St. Paul, MN 55101

This is the eleventh in a series of annual reports containing statistical profiles of the 437 school districts in Minnesota. It is published by the Minnesota Department of Education. This year's report contains data for the 1982–83 school year.

The primary purpose of the report is to provide comparable data on each district's staff, revenues, expenditures, and other topics.

Explanation of Contents

Most of the report consists of statistical tables. Tables on pages 15 through 36 display thirty-eight separate statistics on each of the 432 school districts which offered elementary and secondary education during the 1982–83 school year. Districts are grouped by county, based on the location of their district office. Counties are listed in alphabetical order, and districts are in alphabetical order within each county.

The next set of tables, on pages 37 through 42, displays county, region, and state totals for the same 38 statistics included in the school district tables.

Pages 43 and 44 contain two additional tables. The first lists data for five unique school districts — three districts which operate only elementary schools and two districts which directly operate no schools. The second table lists totals for all districts in each of ten enrollment size categories; this allows easy comparison of districts with similar enrollment size.

Finally, the summary statistics table, on pages 45 and 46, displays the state total, the highest and lowest values, the median value, and various percentile values for each of the 38 statistics included in the report.

The first 12 pages of the report are intended to explain the use of the statistical tables. Pages 4 through 9 contain explanations of some important trends and patterns in elementary and secondary education, illustrated by data from the report. Pages 10 through 12 contain definitions for the 38 statistics included in the tables. Pages 13 and 14 contain an alphabetical list of all school districts and a state map, to aid in locating districts in the statistical tables.

Notes on Financial Data

Expenditure data in this issue of *School District Profiles* is not comparable with data prior to 1980–81. Effective with the 1980–81 school year, all districts were required to convert to a new accounting structure and set of standards called the Uniform Financial Accounting and Reporting Standards (UFARS). The definitions on pages 11 and 12 provide a general explanation of what is included in each current category. In addition, Table 1 shows the specific funds, programs, and objects included in each UFARS category.

Users of the financial data in this report should be aware that there have been some inconsistencies in the ways that districts have reported revenues and expenditures.[1] For example, under UFARS standards, expenditures for employee benefits,

[1] Department of Education staff contacted 62 school districts for which the expenditure data appeared questionable, and obtained revised data for use in this report. In most cases, the problems were due to groups of expenditures being reported in the wrong programs. For these districts, expenditure data in this report may differ from other published data.

such as health insurance and life insurance are to be included in the same program category as used for employee salaries. But some districts incorrectly reported all expenditures for employee benefits in the category, "other operating programs." These inconsistencies do not affect the total expenditures reported by each district. Thus, it is probably valid to compare total K-12 operating expenditures (column 29) among districts. But for any specific category, care should be used in comparing districts. For example, if district A reports higher administrative expenditures than district B, it may be because district A has more administrators or it may be because the two districts code their expenditures differently. Some inconsistencies of this type will always exist. But the consistency of the UFARS data should improve in future years as people become more accustomed to the system.

Paired Districts

Two or more school districts are authorized to jointly provide educational programs if they establish a "pairing" agreement. For example, one district could maintain a junior high school for both districts, and the other district could maintain a senior high school. Such an arrangement might save money for both districts, while permitting them to offer broader and more varied secondary programs.

In 1982–83, the following sixteen districts operated under pairing agreements:

Kensington (#209) and Hoffman (#265)
Sioux Valley (#328) and Round Lake (#516)
Tyler (#409) and Russell (#418)
Marshall (#413) and Lynd (#415)
Halstad (#524) and Hendrum (#525)

Table 1

Sources of Expenditure Data for *School District Profiles*

This table is intended primarily for persons who are familiar with UFARS, and who wish to examine or verify the expenditure data for a specific school district.

Each of the 16 expenditure categories in *Profiles* includes all expenditures within a defined set of funds, programs, and objects, as defined in the upper section of the table below. The lower section of the table summarizes the funds, major program categories, and object categories used for *Profiles*.

For a further explanation of UFARS, and for definitions of specific funds, programs, and objects, see: Minnesota Department of Education, *Manual for the Uniform Financial Accounting and Reporting System for Minnesota Schools*.

Categories Used in the Report	Funds*	Programs**	Objects***
18. District and school administration	1 and 9	1-99	
19. District support services	1 and 9	100-199	
20. Regular instruction	1 and 9	200-299	
21. Vocational instruction	1 and 9	300-399	
22. Exceptional instruction	1 and 9	400-499	All objects
23. Instructional support services	1 and 9	600-699	except 500-599
24. Pupil support services	1 and 9	700-799	and 910
25. Operations and maintenance	1 and 9	800-899	
26. Food service	2	All	
27. Pupil transportation	3	All	
28. Other operating programs	1 and 9	0, 500-599, and 900-999	
29. Total K-12 operating expenditures (this is the total of categories 18 through 28)	1,2,3, & 9	All	
30. Community service	4	All	
31. Capital outlay	5	All	All but 910
	1,2,3, & 4	All	500-599
32. Building construction	6	All	All but 910
33. Debt service	7	All	All but 910

Funds*

2. Food Service
3. Pupil Transportation
4. Community Service
5. Capital Expenditure
6. Building Construction
7. Debt Service
9. Trust and Agency

Major Program Categories**
0 Districtwide (no specific program)
1-99 District and school administration
100-199 District support services
200-299 Regular instruction
300-399 Vocational instruction
400-499 Exceptional instruction
600-699 Instructional support services
700-799 Pupil support services
800-899 Sites, buildings, and equipment
900-999 Other programs

Objects***
500-599 Capital expenditures
910 Transfers to other funds

Renville (#654) and Sacred Heart (#655)
Magnolia (#669) and Luverne (#670)
Echo (#893) and Wood Lake (#896)

These districts are included in the tables in this report. However, some of the data may not be comparable to data for other districts, for two reasons. First, most of the paired districts do not provide a complete elementary-secondary program. Second, the pairing agreements may require sizeable transfers of funds between districts; this may distort the revenue and expenditure data.

For More Information

Additional copies of *School District Profiles, 1982–83* may be purchased from the Minnesota State Documents Center, at 117 University Avenue, St. Paul, MN 55155 (telephone 612-297-3000; or toll free in Minnesota 1-800-652-9747).

If you have questions or comments about the information in this report, or if you would like further information on related topics, please contact the Education Statistics Section.

This section examines change over-the-years in a number of selected statistics. It also describes some of the variation which exists among the school districts.

Number of Students

In 1982–83 the total average daily membership (ADM) of Minnesota public schools totaled 710,681. This was approximately 18,000 or 2.5 percent below the level of 1981–82.

The ADM of individual districts varied tremendously, reflecting Minnesota's heterogeneous demographic makeup. Minneapolis in the highly populous Twin Cities metropolitan area and Humboldt in the sparsely populated northwest portion of the state represented the enrollment extremes (37,927 ADM and 87 ADM, respectively). Table 2 shows more of this variation. Approximately half of Minnesota's districts enrolled 650 or fewer students. But the largest ten percent of the districts enrolled over half of the students.

Percent Attendance

In 1982–83 the average percent attendance in Minnesota public schools was 94.5 percent; i.e. on a typical school day 94.5 percent of all enrolled students were in school and 5.5 percent were absent. This percentage varies little from district to district or from year to year.

For ninety percent of the state's school districts, attendance averaged 94.1 percent or better.

Table 2

1982–83 Resident Average Daily Membership (ADM) for Ten Enrollment Size Groups

Group Number	Size Range (1982-83 Resident ADM)	Number of Districts	Total Resident ADM	Percent of State Total
1.	0 to 234 students	43	8,003	1.1%
2.	235 to 299 students	42	10,745	1.5
3.	300 to 399 students	44	15,781	2.2
4.	400 to 489 students	43	19,719	2.8
5.	490 to 649 students	42	24,201	3.4
6.	650 to 859 students	45	32,909	4.6
7.	860 to 1199 students	44	44,545	6.3
8.	1200 to 1799 students	42	59,919	8.5
9.	1800 to 3699 students	45	116,719	16.4
10.	3700 or more students	42	378,175	53.2
	State Totals	**432**	**710,681**	**100.0%**

Somewhat below average attendance was experienced in a number of the districts in the Twin Cities metropolitan area as well as in some east central and northern Minnesota districts.

Professional Staff

The total number of Minnesota professional staff dropped sharply between 1981–82 and 1982–83 — from 49,236 to 44,553. This 7.6 percent decline is in marked contrast to the relative stability between 1976–77 and 1981–82; staff declined only 5.2 percent during that whole 5-year period. As a result of this decrease the state average pupil-staff ratio increased from 15.1 to 16.0 — an unprecedented single year change. While a continuing drop in enrollments accounted

Table 3

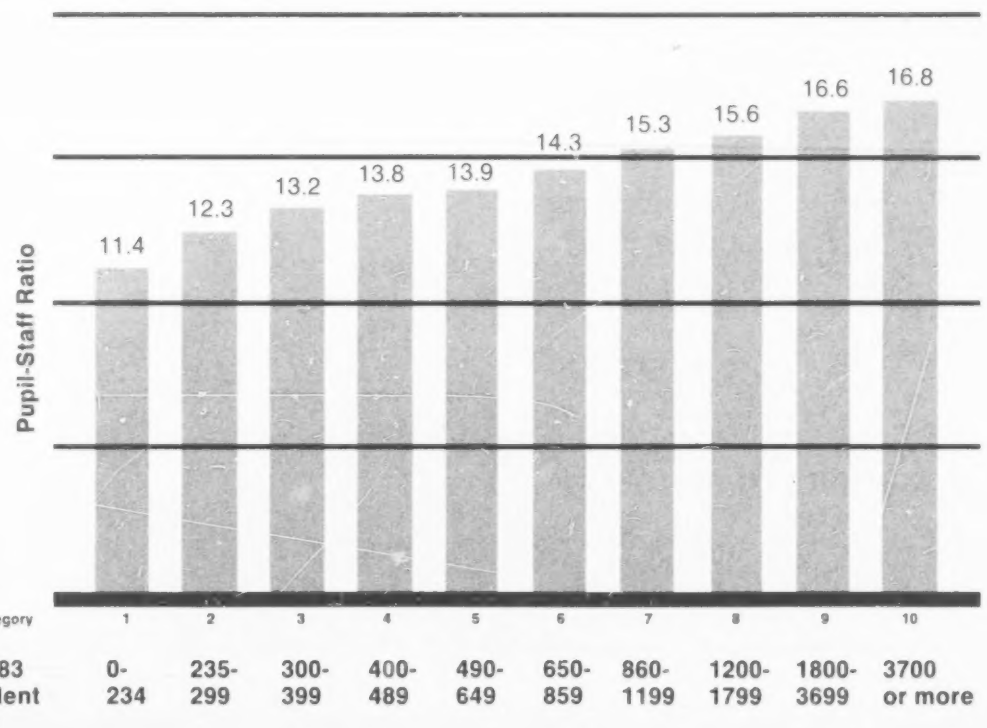
State Totals* of Professional Staff and Pupil-Staff Ratio, 1976-77 through 1982-83

School Year	Total Professional Staff	Pupil-Staff Ratio
1976-77	50,898	16.9
1977-78	49,995	16.7
1978-79	49,723	16.2
1979-80	49,391	15.7
1980-81	49,444	15.2
1981-82	48,236	15.1
1982-83	44,553	16.0

*These totals include all elementary-secondary staff of the 432 districts listed in the tables on pages 15 through 36.

Figure 1

Average Pupil-Staff Ratios, 1982-83 For Ten Enrollment Size Groups



for some of the decline in staff, most of it was likely the result of state budgetary problems which will be discussed in a later section.

Figure 1 shows how the average pupil-staff ratio varied by size of district. The smallest districts had the most staff members per pupil. Each succeeding larger enrollment size category averaged fewer staff members per pupil. This is a fairly typical pattern. The large over-the-year increase in the statewide pupil-staff ratio referred to above (from 15.1 to 16.0) was reflected in increases in each of the ten enrollment size categories. However, the extent of this growth was greater in the larger enrollment categories. This undoubtedly reflects the difficulty smaller districts have in reducing staff and still maintaining a reasonable education program.

Tax Rates

Figure 2 shows average school property tax rates for the past ten years. The average, measured in EARC mills, rose for the second straight year. This contrasts with six years of decline from 1975 through 1981. EARC mill rates have increased 28 percent since 1981 after declining 37 percent during the previous six years. These increases in the average EARC mill rate are due primarily to changes in state funding formula requirements. For example, in 1982 most districts were required to levy an amount equal to 24 mills times EARC in order to receive full basic foundation aid: in 1981 the requirement was only 21 mills. There were also changes in other school levies in both 1981 and 1982.

Figure 2

Minnesota School Tax Rates
State Totals, in EARC Mills

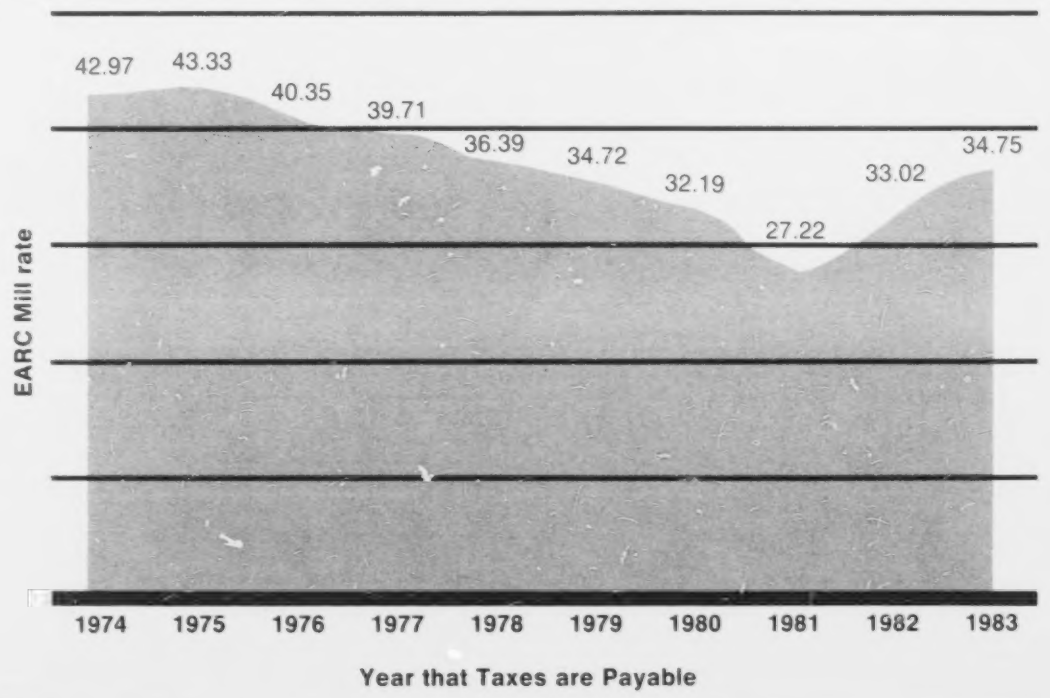


Figure 3

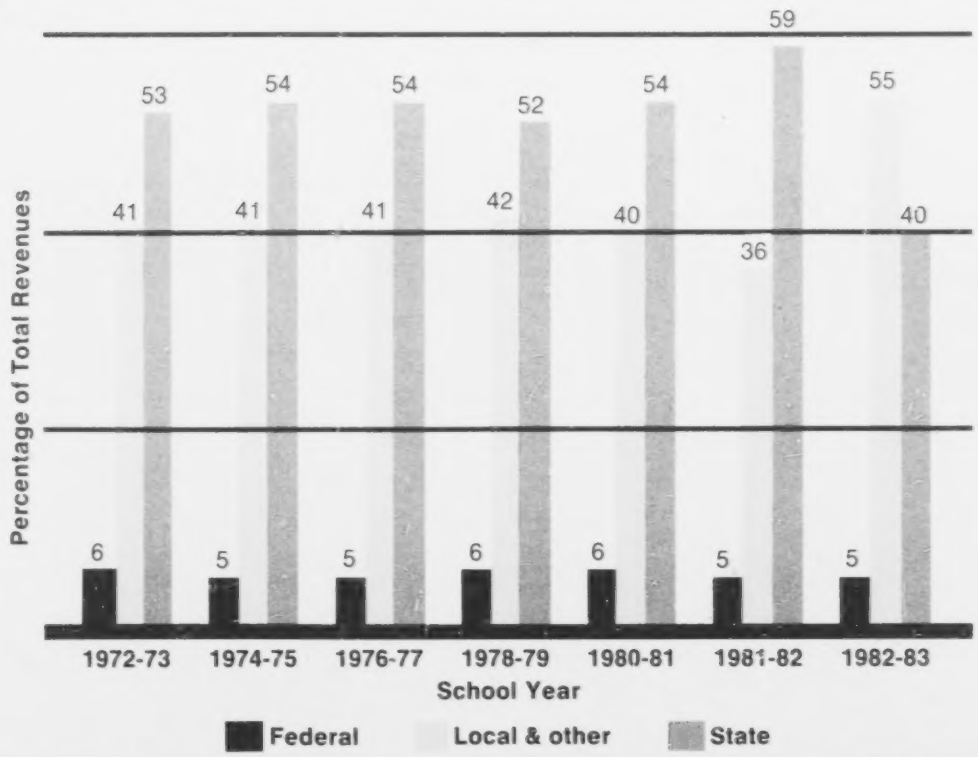
Sources of Minnesota School District Revenues
1972–73 through 1982–83



Sources of Revenue

Minnesota school districts receive resources from three sources — the federal government, the state of Minnesota, and from local sources. The percentage received from each of these sources varies from district to district. In 1982–83 Minnesota districts as a whole received 55 percent of their revenue from local sources, 40 percent from the state, and 5 percent from the federal government. Figure 3 shows how these averages have changed since 1972–73. They were essentially unchanged between 1972–73 and 1980–81 with a roughly 41% local and 54% state revenue distribution. For 1981–82 the state proportion increased. The new 36/59, local/state distribution was largely the result of lowering the authorized basic foundation mill rate from 24 to 21 mills and increasing the formula allowance from $1265 to $1333 per pupil unit.

For 1982–83 the state and local revenue proportions did a reversal and assumed values unprecedented in recent Minnesota history. State funds now accounted for only 40 percent of revenues and local funds for 55 percent. This dramatic change was occasioned by temporary legislative steps designed to maintain the state's financial solvency during the recession of 1981–82. These steps included:

- changes in the basic foundation and transportation aid formulas which resulted in reduced state aid.
- an accounting "shift" which authorized districts to "speed up" the recognition of a portion of property tax revenues — in lieu of the receipt of a similar amount of state aid monies.

- a general 2.48 percent revenue reduction which applied to most aids and some of the components of the levy package.

Operating Expenditures

Total state K-12 operating expenditures per pupil unit increased 5.6 percent between 1981–82 and 1982–83 — from $2274 to $2402. This is less than the 9.6 percent increase between 1980–81 and 1981–82 and is not surprising given the budgetary problems referred to in the previous section of this report.

Table 4 indicates that the percentage of operating expenditures spent in the various categories was generally similar during the past two years. The two most prominent exceptions were the increase in exceptional instruction from 9.9% to 10.3% and the decrease in operations and maintenance from 9.9% to 10.5%.

These can be explained since funding for children with special needs (exceptional instruction) is a category which is pretty well guaranteed by state and federal law. By contrast, districts can exercise some control over their expenditures for operations and maintenance by deferring certain repair and maintenance outlays.

Operating Fund Balances

During the middle and late 1970s most Minnesota school districts chose to save monies by spending less from their operating funds than

Table 4

State Averages of K-12 Operating Expenditures per Pupil Unit, 1981-82 and 1982-83

Category	1981-82 Expenditures	1981-82 % of Total	1982-83 Expenditures	1982-83 % of Total
18. District and school administration	$ 146	6.4	$ 148	6.2
19. District support services	53	2.3	59	2.5
Subtotal, Administration	$ 199	8.7	$ 207	8.7
20. Regular instruction	$1015	44.6	$1074	44.7
21. Vocational instruction	55	2.4	56	2.3
22. Exceptional instruction	225	9.9	247	10.3
23. Instructional support services	72	3.2	75	3.1
Subtotal, Instruction	$1367	60.1	$1452	60.4
24. Pupil support services	$ 59	2.6	$ 60	2.5
26. Food service	118	5.2	121	5.0
27. Pupil transportation	165	7.3	172	7.2
Subtotal, Other students services	$ 342	15.0	$ 353	14.7
25. Operations and maintenance	$ 247	10.9	$ 252	10.5
28. Other operating programs	$ 118	5.2	$ 137	5.7
Total K-12 operating expenditures	**$2274**	**100.0**	**$2402**	**100.0**

they received in revenues. In the three year period from 1977–78 through 1979–80 this savings amounted to a substantial $151 per pupil unit — roughly 10 percent of average annual operating expenditures during that period. Beginning in the 1980–81 school year this trend reversed. In 1982–83, 50 percent of Minnesota's school districts experienced an operating fund balances decline of at least $5/pupil unit. These recent declines were probably the result of pressures created by declining enrollment, declining aids, and fast-inflating energy costs.

Table 5

State Average of Change in Operating Funds Balance, per Pupil Unit, 1976-77 to 1982-83

School Year	Change in Funds Balance, per Pupil Unit
1976-77	+ $ 3
1977-78	+ 47
1978-79	+ 50
1979-80	+ 54
1980-81	− 8
1981-82	− 27
1982-83	− 13

County Number and Name School District Name	District Number	1982–83 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates		Pupil Units (Weighted ADM)	
		1. Pre-Kindergarten Handicapped	2. Kindergarten	3. Elementary (Grades 1-6)	4. Secondary (Grades 7-12)	5. Total (Pre-K thru Grade 12)	6. Percent Minority	7. Percent Attendance	8. Percent Transported	9. Total Staff (FTE)	10. Pupil-Staff Ratio	11. Auditor Mills	12. EARC Mills	13. Resident Pupil Units	14. Total Pupil Units

The tables on pages 15 through 41 contain 38 separate statistics for each school district, county, and region in the state. Definitions of these 38 statistics are given below. All data are for the 1982–83 school year.[1]

1982–83 Resident Average Daily Membership

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be *in attendance* to be counted in ADM, but they must be *in membership* (i.e., currently enrolled in the district). For example, a pupil who is enrolled for the entire school year counts as 1.0 ADM; a pupil who is enrolled for exactly half the school year counts as 0.5 ADM.

The ADM counts in this report are, more specifically, counts of *total resident ADM*. They include all district residents who were enrolled in their home district, plus residents who were educated in other districts and for whom the home district paid tuition. Resident ADM counts are used in calculating foundation aid payments and property tax levy levies. Resident membership includes:

1. **Prekindergarten Handicapped** — ADM of prekindergarten students enrolled in special education programs.
2. **Kindergarten** — ADM of students enrolled in kindergarten classes.
3. **Elementary, Grades 1–6** — ADM of students enrolled in grades 1–6, including students in elementary-level ungraded and special education classes.
4. **Secondary, Grades 7–12** — ADM of students enrolled in grades 7–12, including students in secondary-level ungraded and special education classes.
5. **Total** — Total ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Pupil Data

6. **Percent Minority** — The percentage of the district's students who are of American Indian, Alaskan, Black, Asian, or Hispanic origin.
7. **Percent Attendance** — The average ratio of days attended to days enrolled, for all students in the district.
8. **Percent Transported** — The number of public school students transported to and from school twenty or more days, as a percentage of the district's total enrollment.[2]

Professional Staff

These statistics provide information about each district's professional staff. Staff are counted in full time equivalents (FTE). For example, a full time staff member is counted as 1.0 FTE; one employed only half time is counted as 0.5 FTE. Staff counts include only elementary-secondary personnel; post-secondary teachers and administrators are excluded.

9. **Total Staff FTE** — The total number of licensed professional staff employed by the district, measured in full time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.
10. **Pupil-Staff Ratio** — The average daily membership of all students (both residents and nonresidents) who were enrolled in the school district, divided by the number of professional staff (column 9).

Tax Rates

These figures show the tax rates, expressed in mills, for school district property taxes payable in 1983. Taxes payable in 1983 provide revenue for the 1983–84 school year.

11. **Auditor Mills** — The actual school district tax rate, as determined by the county auditor. If the auditor tax rate is 50 mills, then a property owner would be taxed $50 for each $1,000 of assessed value. Because of differences in local property assessment practices, comparisons of auditor tax rates among districts may not be meaningful.
12. **EARC Mills**[3] — This tax rate is computed by multiplying the district's auditor tax rate times the 1982 market sales ratio. The market sales ratio is essentially an estimate of the average ratio of the market value of a district's taxable property (as determined by local assessors) to the actual selling price of the property. Market sales ratios are less than 1.0, so each district's EARC mill rate is less than its auditor mill rate. Market sales ratios are compiled by the Minnesota Department of Revenue, and formally published by the Equalization Aid Review Committee, or EARC.

    EARC tax rates are computed to compensate for differences in assessment practices. Thus, when comparing the level of gross tax burden in various districts, these rates provide a better comparison than auditor tax rates.

County Number and Name School District Name	District Number	1982–83 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates		Pupil Units (Weighted ADM)	
		1. Pre-Kindergarten Handicapped	2. Kindergarten	3. Elementary (Grades 1-6)	4. Secondary (Grades 7-12)	5. Total Pre-K thru Grade 12	6. Percent Minority	7. Percent Attendance	8. Percent Transported	9. Total Staff (FTE)	10. Pupil-Staff Ratio	11. Auditor Mills	12. EARC Mills	13. Resident Pupil Units	14. Total Pupil Units

Pupil Units (Weighted ADM)

13. **Resident Pupil Units** — This figure is computed by applying weightings to the district's resident average daily membership (ADM), which is shown in columns 1 through 5. Each kindergarten ADM counts as 0.5 pupil units; each prekindergarten, kindergarten handicapped, and elementary ADM counts as 1.0 pupil unit; and each secondary ADM counts as 1.4 pupil units. Resident pupil units are used in calculating the district's state foundation aid payments and property tax levy limitations.
14. **Total Pupil Units** — This figure includes the district's resident pupil units (column 13) plus the weighted ADM of two other groups of students: 1) students who reside in other districts but are enrolled in this district[4], and 2) nonpublic school students who attend the public school part-time for specific classes or services.[5]

Revenue Percentages

These three columns show the percentage of each district's revenues from the federal government, the state government, and local and other sources. The percentages are based on all 1982–83 revenue reported by each district, except for proceeds from sales of real property and equipment, insurance recoveries, sales of bonds, loans, and interfund transfers.

15. **Federal** — The percentage of revenues from the federal government, whether paid directly or through another governmental unit.
16. **State** — The percentage of revenues from the Minnesota State government, including foundation aid, property tax credits that are paid to the school district, and all other state payments to school districts.
17. **Local and Other** — The percentage of revenues from local and other sources. This category includes revenues from property taxes, interest, rent, gifts, tuition and fees, sales of assets other than real property and equipment, payments from other school districts, and all other sources except for federal and state government.

1982–83 Expenditures Per Pupil Unit

Columns 18 through 33 show each district's 1982–83 expenditures in sixteen different categories, divided by total pupils units (column 14). Columns 18 through 30 include all expenditures for the indicated purpose, except capital expenditures.

18. **District and School Administration** — Expenditures for the school board and for the office of the superintendent, principals, and any other line administrators who supervise staff.
19. **District Support Services** — Expenditures for central office administration which are not directly related to instruction, pupil support (see #24), or community services (see #30). Examples include expenditures for business services, data processing, legal services, personnel office, printing, and the school census.
20. **Regular Instruction** — Expenditures for elementary and secondary classroom instruction, not including vocational instruction (#21) and exceptional instruction (#22), and for cocurricular and extracurricular activities. Examples include salaries of teachers, classroom aides, and coaches, and expenditures for classroom supplies and textbooks.
21. **Vocational Instruction** — Expenditures in elementary and secondary schools for instruction that is related to job skills and career exploration. Examples include expenditures for home economics, industrial, business, agriculture, and distributive education.
22. **Exceptional Instruction** — Expenditures for instruction of students who, because of atypical characteristics or conditions, are provided educational programs that are different from regular instructional programs. Examples include expenditures for special instruction of students who are emotionally or psychologically handicapped, gifted and talented, or mentally retarded; for students with physical, hearing, speech, and visual impairments; and for students with special learning and behavior problems.
23. **Instructional Support Services** — Expenditures for activities intended to help teachers provide instruction, not including expenditures for principals or superintendents. Examples include expenditures for assistant principals, curriculum development, libraries, media centers, audio-visual support, staff development, and computer assisted instruction.
24. **Pupil Support Services** — Expenditures for all non-instructional services provided to students, not including transportation and food. Examples include expenditures for counseling, guidance, health services, psychological services, and attendance and social work services.
25. **Operations and Maintenance** — Expenditures for operation, maintenance, and repair of the district's buildings, grounds, and equipment. Examples include expenditures for custodians, fuel for buildings, electricity, telephones, and repairs.
26. **Food Service** — Expenditures for the preparation and serving of meals and snacks to students.
27. **Pupil Transportation** — Expenditures for transportation of students, including salaries, contracted services, fuel for buses, and other expenditures.

District Number	Revenue %			1982 – 83 Expenditures per Pupil Unit															Other Measures per Pupil Unit				
	15. Federal	16. State	17. Local and other	18. District and School Admin.	19. District Support Services	20. Regular Instruction	21. Vocational Instruction	22. Exceptional Instruction	23. Instructional Support Services	24. Pupil Support Services	25. Operations and Maintenance	26. Food Service	27. Pupil Transportation	28. Other Oper. Program	29. Total K-12 Operating Expenditures	30. Community Service	31. Capital Outlay	32. Building Construction	33. Debt Service	34. Operating Funds Balance	35. Change in Funds Balance	36. State and Local Oper. Costs	37. Long Term Debt	38. 1982 EARC Value

28. **Other Operating Programs**[6] — Includes all operating expenditures that were not charged to any other category (columns 18–27).
29. **Total K–12 Operating Expenditures** — The total of the eleven preceding categories of expenditures (columns 18 through 28). This figure includes all expenditures incurred for the benefit of elementary and secondary education during the 1982–83 school year, except capital and debt service expenditures.
30. **Community Service** — Expenditures for recreation, civic activities, adult education, early childhood education, or similar programs which are not conducted primarily for elementary and secondary students, and for noncredit summer school programs.
31. **Capital Outlay** — All expenditures for acquisition or replacement of assets that have benefits for more than one year, except expenditures for construction of new buildings and additions (see #32). Includes expenditures for purchase of land and equipment, for remodeling and improvements to existing buildings, and for leasing of equipment and buildings.
32. **Building Construction** — Expenditures for construction of new buildings and additions, including payments to contractors, costs of advertising for contracts, architects' and engineers' fees, costs of paint and decorating, costs of equipping new buildings, and all other related costs.
33. **Debt Service** — Expenditures for repayment of long term debt (see #37), including payments of principal and interest on bonds and loans.

Other Measures Per Pupil Unit

34. **Operating Funds Balance** — This figure is a measure of the district's financial condition at the end of the 1982–83 school year, and of how much resources are available to be used in future years. It is equal to the sum of the unappropriated balances on June 30, 1983, from the four operating funds (general, food service, pupil transportation, and community service funds), excluding the amount of statutory operating debt, plus the appropriated fund balance for current use of taconite payments: this balance is then divided by 1982–83 resident pupil units (column 13).
35. **Change in Funds Balance**[7] — The difference between the district's operating funds balance on June 30, 1983 (see #34 above) and on June 30, 1982, divided by 1982–83 resident pupil units. This is essentially equal to the difference between the district's 1982–83 revenues and expenditures, for the four operating funds combined. Thus, a negative number indicates that the district's expenditures in the operating funds were greater than its revenues.
36. **State and Local Operating Costs** — This figure, also called adjusted maintenance cost, is often used to compare overall costs of education among districts. It is essentially the net cost per pupil unit of education that is financed through state and local funds. It is computed as follows:

    Sum of all expenditures for current operation of the schools (doesn't include expenditures for transportation, community services, capital outlay, building construction, or debt service),
    Minus all revenue from the federal government,
    Minus revenue from sale of food and materials,
    Minus admission fees and gate receipts from school activities;

    (This total is then divided by 1982–83 total pupil units (column 14).
37. **Long Term Debt** — The amount of long term debt outstanding on June 30, 1983, divided by 1982–83 resident pupil units. Long term debt includes general obligation bonds and capital and debt service loans from the state.
38. **1982 EARC Value** — The 1982 adjusted assessed valuation of the district, as published by the Equalization Aid Review Committee (EARC), divided by 1982–83 resident pupil units. This figure is an indicator of the district's ability to raise revenue through local property taxes.

[1] There are three exceptions to this general rule. The two tax rate statistics (columns 11 and 12) are for taxes payable in calendar year 1983; these taxes will provide revenue for the 1983–84 school year. The EARC value (column 38) is based on property values in 1982; this figure will be used in computing state aids and tax levy limitations for the 1984–85 school year.

[2] For some school districts and some categories of students, the counts of students transported were estimated for column 8.

[3] For districts in the Twin Cities area which are members of a special intermediate vocational-technical district (districts 287, 916, and 917), the EARC mill rate shown in column 12 includes a small additional tax rate for the special intermediate district. This additional tax rate is not included in the auditor mill rates, nor is it included in the county, region, or state EARC mill rates.

[4] In computing total pupil units, students who are residents of one school district but attend school in another district are counted in both districts, if the resident district pays tuition to the district attended. In 1982–83 there were 7,580 students (4,770 pupil units) in this category. Thus the state total of pupil units in column 14 of this report includes some double counting. This measure of pupil units is used because it provides the most valid comparison with expenditures. If these students were counted only in their resident district or only in the district attended, the expenditures per pupil unit would be inaccurate in the other district.

[5] These nonpublic school students, often called "shared time" students, were not included with total pupil units prior to the 1980–81 issue of *School District Profiles*. For the state as a whole, they represent only 1447 pupil units, which is less than 0.2 percent of total pupil units. In a few school districts, however, they make up a significant share of total pupil units. For these school districts, the inclusion of shared time students causes an increase in total pupil units, and a slight decrease in all categories of expenditures per pupil unit (columns 18–33, and column 36).

[6] Some school districts included all expenditures for employee benefits in the same UFARS programs as the employees' salaries. Thus, for example, health insurance for the superintendent is included with "district and school administration" (column 18), and benefits for teachers are included with instructional programs (columns 20, 21 and 22). Other districts reported all expenditures for employee benefits separately; for these districts, the expenditures show up in "other operating programs" (column 28). Because of this difference in accounting practices there is wide variation in the amounts reported in column 28.

[7] There are twenty school districts which received taconite payments under Laws of Minnesota for 1978, Chapter 746. For these districts the figure in column 35 is $20 to $30 lower than the change in the *unappropriate* operating funds balance per pupil unit, which is published in some other Department of Education reports.

The figures listed on the next six pages are, for each county, totals for all school districts which have their central offices in the county. Totals are also listed for the state's thirteen development regions and for the entire state. Counties are listed by region, with the regions in numerical order. The map on page 14 shows region and county boundaries.

DATA BY ENROLLMENT GROUPS

The tables below list totals for all districts in each of ten enrollment size groups, based on 1982-83 resident average daily membership (ADM). For example, group 1 includes all districts with 234 or fewer ADM, and group 2 includes all districts with 235 to 299 ADM. Each group includes approximately ten percent of the state's school districts (i.e., 42 to 45 districts).

Unlike the other 432 districts listed in this report, the five districts in the table below do not directly operate both elementary and secondary schools. The first three districts (Nett Lake, in St. Louis County; Pine Point, in Becker County; and Winsted, in McLeod County) operate elementary schools, but their secondary students are transported to other districts.

The other two districts (Franconia, in Chisago County; and Prinsburg, in Kandiyohi County) directly operate no schools, but contract with other districts for the education of their resident students.

Because of their unique structures and functions, it may be misleading to compare these districts to the elementary-secondary districts in this report. Data for these five districts are not included in the Summary Statistics Table or in the county, region, and state totals.

The chief purpose of this table is to permit easy comparisons of districts with similar enrollments. For example, a superintendent in a district with 600 pupils may want to examine the totals for group 5 (490 to 649 ADM), to see how his/her expenditures compare with other districts that are about the same size.

SUMMARY STATISTICS

The table below lists a variety of summary statistics for each of the 38 variables included in this report. The attendant definitions explain the meaning of these summary statistics.

This table may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 7) varies little among districts, from a low of 85.7 to a high of 97.6. Ninety percent of the school districts are within the narrow range of 93.6 (5th percentile) to 96.3 (95th percentile). By contrast, percent transported (column 8) varies greatly, from a low of 9 to a high in 100.

The table may also be used to see how an individual school district compares with other districts in the state. Three examples illustrate this use of the data.

1. A district which has total K-12 operating expenditures (column 29) of $2,350 per pupil unit is very near the median value, which is $2,338. Thus, about half the districts in the state have lower expenditures and half have higher expenditures.
2. A district with a pupil-staff ratio (column 10) of 6.2 could see from this table that they have the lowest pupil-staff ratio in the state.
3. A district with total average daily membership (column 5) of 340 students is between the 20th and 25th percentiles for this variable. Thus, between 20 and 25 percent of Minnesota school districts have fewer students than this district.

Definitions

Lowest Value — For any specific variable, the lowest value of that variable among all 432 school districts. For example, the lowest EARC mill rate (column 12) for a Minnesota school district is 17.21 mills. The table also shows the highest value for each variable.

XXth percentile — For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total staff (column 9) is 20; this means that approximately 10 percent of the school districts have fewer than 20 staff members, and 90 percent of the districts have more than 20 staff. The 25th and 75th percentile are also called quartiles; the 10th, 20th, 30th, . . . through 90th percentiles are also called deciles.

Median — For any specific variable, a value chosen such that half of the school districts are below the chosen value, and half are above. For example, the median number of resident pupil units (column 13) is 758. This means that half the school districts have fewer than 758 resident pupil units, and half have more than 758.

State Total — For variables 1-5 (1982-83 resident average daily membership), 9 (total staff), and 13-14 (pupil units), the state total is simply the sum of the corresponding value for all 432 districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by the sum of the denominators. For example,

$$\text{State total pupil-staff ratio} = \frac{\text{State total of pupils}}{\text{State total of staff}}$$

For these variables, the state total is a form of weighted average.
